DETAILED ACTION

Allowable Subject Matter

Claims 11-14 and 17-20 are allowed.

As per claims 11-14 and 17-20, specifically independent claims 11, 13, 17 and 19, the prior art of record fails to adequately teach or suggest a method for configuring an installation comprising a plurality of solar protection devices, the method comprising a parameterization step, performed by an operator, in which at least two of the following steps are performed:

- a) entry of data defining an exposure of an opening fitted with a solar protection device, with respect to the sun;
- b) entry of data defining a type of solar protection device; and
- c) entry of data defining the maximum desired depth of penetration of the sun into a building OR a desired comfort,

in combination with a step in which a control algorithm is then calculated for each solar protection device, and wherein a step occurs that modifies the coefficients of the control algorithms for the solar protection devices so that any conflicts and interactions may be effectively managed, and wherein the solar protection devices are then controlled according to the calculated control algorithm, in combination with the other claimed features and or limitations as claimed.
